

Step 1

SYSTEM CONNECTION

1. SYSTEM CONNECTION PQS

The universal measuring modules of the QUADRIGO MM line provide maximum flexibility and independence. Designed as an installation module in existing switching and control cabinets, they practically always find a suitable place in the plant layout without requiring extra space.

- SPOT WELDING
- PROJECTION WELDING

- Alternating current (AC)
- Direct current (DC)
- Medium frequency (MF)
- Condenser discharge (CD)

Transfer of monitoring setting via Ethernet to the QUADRIGO measurement module

PQS-RES software package incl. database installed on industrial PC system

Transfer of process data via Ethernet to PQS-software
