

# XPQS-NET

XPQS-NET the perfect connection to your network

The data of your production with XPQS-Net in your system

# XPQS-NET

## PERFORMANCE

Based on the XPQS system, the Net variant offers a server-client solution to make the monitoring and documentation of your production more flexible.

## CHARACTERISTICS

- Supplement to the XPQS software
- Server – Client function with up to 8 possible clients
- Freely configurable OPC UA interface for flexible integration of process data into different higher-level customer systems
- All data is stored centrally on a server and can be accessed from there by any type of client.

... and much more
